	Urgent	Not Urgent
Important	**Do - (Your MVP)** ● Download MP3 or WAV files from URL or Search ● Well integrated media controls (able to adjust replay, back, forward, and pause/play from lock screen widget like other media app, while handling controls better than Android's File app.) ● Search for videos from app	**Schedule - (For V2.0+)** ● More audio options (OPUS, etc etc) ● MP4 and video support
Not Important	**Delegate - (Use a library)** ● Downloading the actual files (delegate to yt-dlp) ● GUI (Delegate to React and GUI libraries)	**Delete - (Cut it)** ● Spotify, Apple Music, and Youtube Music integration (ability to download music from those services) ● ●
